

## **Note on Children Safety**

All educational institutions schools, government or private, are custodians of children during the time the children are in their premises. It is thus the responsibility of the School Management/administration is to ensure that children are safe from all forms of danger/violence. Therefore, along with the Principal, school teacher, warden or the staff of the school and vehicles are responsible for the safety of the kids and necessarily be wary of it at the highest levels.

We all are aware of the fragile nature of children, pushing while playing which is highly perilous, assembling for assembly in no order, running on the corridors, leaning on the highly exposed balcony rails, vulnerable wet floor of restrooms, fraught with danger staircases without supervision, classrooms unattended, unpredictable pointed edge of the desks/benches, unsafe door-locks and many more precarious objects/areas. We all are responsible to ensure that whenever and wherever possible, a teacher is omnipresent to ascertain the proximity of the children in order to safeguard them from any mishap.
